

Recipient Demographic and Health Summary Extract (Health Home Patient Profile) to ODJFS

Technical Name: Recipient Demographic and Health Summary Extract (Health Home Patient Profile) to ODJFS

Descriptive Name: Recipient Demographic and Health Summary Extract (Health Home Patient Profile) to ODJFS

Description: One-time recipient demographic and health summary extract sent to ODJFS for distribution to Health Home Providers that will be enrolled at the launch of the Health Home project. The file contains recipient demographic information and health summary information, including certain diagnoses and utilization categories, for lists of recipients that are enrolled with specific health home providers (the list of providers and recipients will be provided by ODJFS to HP). Reference the layout shown below. In addition, details on the criteria for the health summary information that will be included, as well as the source to target mappings, can be found in the Excel spreadsheet located under Supplemental Documentation.

Layout:

Reference the detail file layout titled 'Recipient Demographic & Health Summary Extract (Health Home Patient Profile) to ODJFS.xls' attached to this System Object under the Supplemental Documentation section for details on the inclusion criteria for the file. The following is details on the formatting of the file:

- This extract will be transmitted from HP to ODJFS via SFTP using TIBCO and Connect Direct. ODJFS will distribute the extract to the providers.
- The following are details on the formatting of the file.
- This file will be a fixed file length with both field lengths being fixed and the overall file length being fixed.
- It will be delimited file with the delimiter between the fields being a tilde ~
- The format will be ASCII.
- Numbers (noted with a BIAR Source Data Type of NUMBER) will be right justified with leading zeroes. Decimals are implied.
- Character fields will be left justified with trailing spaces.
- The end of record delimiter will be Hex '0A'.
